Amendments to the Drawings

Replacement drawing sheets are submitted herewith for Figs. 9 and 12 so as to:
(1) correct the top-most instance of "224" to --226-- in Fig. 9; and (2) correct "221" to --226-- in Fig. 12.

REMARKS

This amendment is presented after allowance of the application so as to make minor editorial corrections to the specification and drawings. In particular, the reference numeral "224" has been changed at line 2 of page 16 of the substitute specification filed July 25, 2006, and replacement drawings for Figs. 9 and 12 are submitted herewith to change "224" at the top of Fig. 9 to --226-- and to change "221" in Fig. 12 to --226--.

These revisions are necessary because reference numeral "224" was inadvertently used in the specification and drawings to refer to two different elements. For example, in addition to previously referencing flange 224 in Fig. 9 and at line 2 of page 16 of the substitute specification filed July 25, 2006, reference numeral 224 was used to refer to the passage 224 shown at the bottom of Fig. 9 and referenced at line 2 of page 7 and line 10 of page 9 of the substitute specification filed July 25, 2006. Further, the revision to Fig. 12 is necessary to avoid the incorrect use of the reference numeral 221 in Fig. 12 since the reference numeral 221 refers to a control port 221 in Fig. 9 and at line 2 of page 2 of the substitute specification.

Accordingly, it is respectfully requested that this amendment be entered as being directed to matters of form not affecting the scope of the invention.

Respectfully submitted,

Mitsuharu MAGAMI et al.
